

# Floor Drain HANZA

New Design For Bathroom Drainage Systems

Innovation in Drainage

 Made in Iran

## Floor Drain HANZA

### Quality, Safety and Design

The Modern Linear Shower Drain adds a new geometric design for a transitional and modern look, adding a new design option to your bathroom floor. The linear drain was inspired by commercial trench drains utilized industrially for high flow drainage. The styling is very fashionable but is also just a great solution.

We can offer you a predictable installation with our system. Our curb-less shower is a great solution for mobility, design and ergonomics. Top quality materials, convenient installation conditions and flexible connection options are the hallmarks of the HANZA floor drain.

## Floor Drain HANZA

### Stainless Steel

The material of choice when High load bearing and durability are called for . Or more precisely , 304 stainless steel. this high quality material offers definite advantages in terms of torsional rigidity and tough, resistance surface finishes.in addition, stainless steel is highly resistance to chemicals-which is important in bathrooms where HANZA drainage channels encounter shampoo,shower gel,detergent etc. practically every day. When cleaned properly , stainless stell maintains its almost timeless beauty and will last forever.

This is an advantage that many of our customers appreciate after years of use.

#### Advantages of the linear drainage system

- ▶ Almost limitless design freedom
- ▶ Custom design variants
- ▶ Aesthetic and convenient
- ▶ Timeless and design oriented
- ▶ Accessible and Approved

## HANZA Floor Drain Components :

### ► Main Drain Body

- Made of high quality 304 stainless steel
- With odor remover
- Particularly secure and strong thanks to raised edging
- Resistance to chemicals and mechanical loads
- Reliable basic concept that meets the standards (DN 50, drainage capacity, water trap height)
- With internal slope For complete drainage of water
- With vertical outlet R63
- With 2 installation feet

### ► Tile Recess

- Made of high quality 304 stainless steel
- Designed specifically for use with tiles and natural stone  
With a high glass finish
- With polished face edges for insertion in drainage line housing
- Cut tile and natural stone edge protected by raised edging
- Raised edge facilitates reinforcement

### ► Classic Design Grating

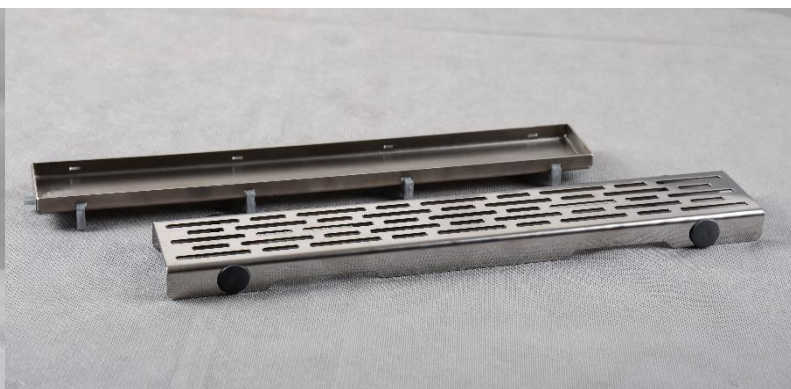

- Made of high quality 304 stainless steel
- High quality workmanship and easy to clean
- Classic design grating , made of polished stainless steel

## HANZA Linear Shower Drains Types :

### 1 ► HANZA Linear Shower Drain 45 cm

- Nominal length..... 45 cm
- Visible length after installation ..... 40 cm
- Nominal width..... 14 cm
- Visible width after installation..... 8 cm
- Overall height.....12 cm
- Height to the drain body.....15 mm
- PVC Vertical outlet..... 50 mm
- Stainless steel Vertical outlet..... 63 mm
- With tile recess( Dimension stone or ceramic : 410\*50\*12mm )
- With classic design grille

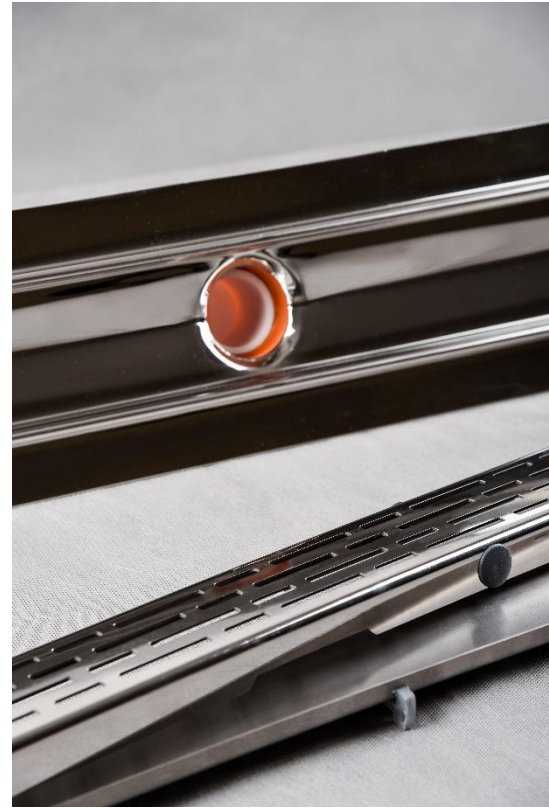

**With Tile Recess**

**With classic design grille**

**2 ► HANZA Linear Shower Drain 90 cm**

- Nominal length..... 90 cm
- Visible length after installation ..... 85.5 cm
- Nominal width..... 14 cm
- Visible width after installation..... 8 cm
- Overall height.....12 cm
- Height to the drain body.....15 mm
- PVC Vertical outlet..... 50 mm
- Stainless steel Vertical outlet..... 63 mm
- With tile recess ( Dimension stone or ceramic : 830\*50\*12mm )
- With classic design grille

**MTgroup** Was established in 2005 And by working with agencies to improve their knowledge of engineering and technology companies in different parts of the source (Building, industry, oil, gas, petrochemical, water and wastewater) is active , In addition to knowledge transfer in the field of Engineering , efficient and diverse materials produced in the IRAN.
